# STRUCTURAL STEEL

THE ROSE CORPORATION

# Fully Custom American Steel

Rose produces large-scale industrial parts, components, and products, fully produced here in the United States. All Rose products are designed for manufacturability (DFM) review and assistance, custom engineering, and detailing.

## Bridge & Structural Steel Fabrication and Erection

The Rose Corp. produces structural steel for a variety of applications, including bridges, through cutting, bending, welding, drilling and assembling.

## Fully Customizable

Rose has the capacity to fulfill your custom requests, including industrial blasting and painting.

## Steel Options

Rose uses carbon structural and stainless steel, including bridge-specific steel grades and weathering steel.

## Available for Production

Girders, beams, pipes, trusses, columns, railroad bridges, bridge nodes, etc. are available for custom order.

## Assembly and Quality Testing

In-house weld examination is performed as well as functional, quality, and integrity testing before products are delivered.
